Super-Syphon
Quietly collecting water seepage year after year

C.S.I. High Water Alarm

The alarm operates on 120 Volts AC, 9 Volts DC or 120 Volts AC with 9 Volts back-up. It has a dual tone audible alarm for both liquid level and circuit failure as well as a visual alarm. Constructed of non-metallic enclosure and safe 9 Volt operation through use of a 120 volt-to-9 Volt transformer. The power monitor lamp will go out if power to the system fails also sounding the 85 decibel solid tone to alert you to the problem.

Rubber Fittings

The discharge line is equipped with rubber fittings for sound and vibration reduction. Electrical lines also are rubber grommeted for air tight fit.

Zoeller M₅₃

1/3 H.P. and a cast iron housing. This pump effortlessly pumps 2750 gallons per hour quietly. Also non-clogging vortex impeller design, with automatic reset thermal over load protection.

A quality pump is truly the heart of any water management system. Quietly collecting water seepage year after year the Super-Syphon system is the BOSS. using this high quality Super-Syphon system with should last you the life of your home.

Jackel Air Tight Cover

This bolt down air-tight cover is strong enough to stand on, complete with air tight gasket and vibration absorbing fittings to ensure quite smooth operation. Cover guide keeps the pump centered, eliminating any unwanted centering rings in the bottom of the basket.

Jackel Basin 18" x 24"

Heavy duty polyethylene construction. No unwanted centering ring in the bottom to restrict water flow and collect harmful debris that might ruin pumps impeller.
